

## KEMUSOTE - Light entrepreneurship and resilience as an enhancer for conditions and work well-being in social and healthcare sector -project briefly in English

The main objective of the KEMUSOTE project is to strengthen the prerequisite for operation, resilience, work well-being and lengthening of working careers in social and healthcare sector. In addition, the project produces knowledge of the co-operative form's feasibility as a way of organizing social and healthcare services in areas of dispersed settlement. Consequently, the project will contribute to market operability and enhances multi producers as a way of producing services.

### The aims of the project are:

1. To improve the know-how and resilience of light entrepreneurs, including readiness to develop new kind of services, especially for the social and healthcare sector.
2. To develop service concepts into new service production models in the social and healthcare sector, that take into account the special features of work and support well-being at work.
3. To survey the feasibility of the co-operative form and to create a plan of action on how to carry out social, healthcare and well-being sector's services in areas of dispersed settlement (archipelago of Turku).
4. To survey and assemble the ideas, knowledge, experiences and feedback from the actions carried out in the aims 1-3. Based on the survey, a model on how to control and build a working career as a light entrepreneur is being developed.

KEMUSOTE-project is managed by JAMK University of Applied Sciences and it is carried out in collaboration with TAMK, XAMK, Turku, Humak and Laurea Universities of Applied Sciences 1.3.2020 - 28.2.2023.
